

Anti-Rad22 (*S. pombe*) antibody, affinity purified

63-003 50 ug

Rad22 protein of *Schizosaccharomyces pombe* (469 aa, 52 kDa) is a functional and structural homolog of *Saccharomyces cerevisiae* and human Rad52 proteins, which play a major role together with Rhp51 in genetic recombination and recombination repair, by mediating strand annealing reaction between homologous DNA strands.

Applications

- 1) Western blotting (x 2,000~5,000 dilution)
- 2) Immunoprecipitation
- 3) Immunofluorescence Staining
- 4) ELISA

Immunogen: Recombinant full-size Rad22 protein of *S. pombe*

Expressed in *E. coli*.

Purification: Affinity-purified with highly purified Rad22 protein conjugated with agarose beads.

Form: 1 mg/ml in PBS with 50% Glycerol, filter-sterilized

Storage: Sent at 4°C or -20°C and store at -20°C
